

# MEET OUR ANIMALS!

1+ hrs

Edmond Hall used to be a working farm, and these days we keep animals to make a link with that farming history. During a residential visit you meet our pets, feed them and learn about how to look after them. They all have their own characters, and they help us learn about great qualities like kindness, and being caring. They make us feel cheerful and are good companions, and we love sharing them with visitors who don't have a pet at home. Let's meet the Edmond Hall animals and make our own too!

1. First, Do you have a pet? If you do:
  - Think of at least 5 bits of information about your pet that you can share with your class or a friend.
  - Think about how you might share your pet with your class. Might it be through video, or writing, or drawing?
  - Try to be descriptive so we really get to know them.
2. **My new pet.** What kind of pet could you create?! Create your own pet using natural materials or household items. What is its name? What does it eat? If you don't have a real pet, share your new creation with your class as above.
3. Need some inspiration? You could try making a [Toilet Paper Roll Dog](#), or create a bird from Ingestre's [Stay Creative Pack 1](#), or even "[collage yourself a pet](#)"

## WHEN YOU'RE DONE

1. Make a classroom display with everyone's pet
2. In your diary or on some paper, finish the sentence WITHOUT saying 'happy' or 'sad' - "My pet makes me feel \_\_\_ because \_\_\_."

Share a pic at [#SRESatHome](#)

## YOU WILL NEED:

- Pens, paper,
- craft materials
- glue
- scissors
- natural materials
- recycled materials
